

USE CASES OF IOT:

1. Autonomous and Connected Vehicles
2. Augmented Reality
3. Virtual Reality
4. Wearable technology like smart watches ,fitness trackers and hearables
5. Machine-to-machine connected devices
6. Supply chains of the Future
7. Drones
8. Smart cities
9. Healthcare
- 10.Smart Agriculture
- 11.Companion robots
- 12.Smart Security for Businesses and Homes
- 13.Industrial process automation
- 14.Energy management(Smart grid, renewable energy systems, prognostics)
- 15.Electronic road toll collection and traffic management
- 16.Smart parking
- 17.Noise monitoring
- 18.Waste Management
- 19.Water management through Smart Irrigation, Water quality management
- 20.Smart Homes
- 21.Smart Metering
- 22.Green House
- 23.Machine diagnostics
- 24.Air quality monitoring
